Subject: Congressional Inquiry - Ex. 6 Personal Privacy
Attachments: Ex. 6 Personal Privacy PRF.pdf

Good Evening,

Our office was recently contacted by Ex. 6 Personal Privacy (PP), who has concerns regarding the mishandling of LEAD fallout of the Mueller Industries in Port Huron.

At this time, our office is requesting a review of the constituents concerns. Please mark Senator Gary Peters' interest in this case and notify our office of any significant developments. Any information you could provide would be greatly appreciated. A privacy release is attached.

Please let me know if you have any questions or concerns,

Jessica Cady, MSW
Constituent Services Representative
Senator Gary C. Peters

Jan. 23, 2020

Dear Sirs,

As a long time resident of Port Huron, Michigan near the Mueller Brass Ind. we have been exposed to numerous exposures caused by this M.B.I. The biggest exposure to fallout of by-products of M.B.I. in our air prior to settling in our soil and water. The handling of our complaint by Michigan E.G.A.E. previously M.D.E.D. while prompt initially, has been at a snail's pace. The State Attorney General Dana Nessel and State Representative Shane Hernandez have not responded to our efforts to protect us residents. Please let me summarize the issue & dates.

On morning of May. 17, 2018 we found a large amount of black substance on our vehicles in the driveway. This was after a neighbor stop to question the fallout he encountered coming home from work. I called M.D.E.D. Report attached. Please note: In paragraph 44 on reverse a phone call by a Mr. Kuntz stated other activities outside their facility. He lied when stating snow activity on Taylor-Spence St. As councilman I determined by phone the according to city No sewer or construction work on these streets.

Subsequently, samples of fallout on our two vehicles were taken and tested and matched the Mueller Brass sample taken same day. Results showed high contents of multiple particulates by MDEQ environmental laboratory and subsequently EMSL Analytical Inc. 50 A Northwest Drive #4 Salem N.H. 03079 PH# (603) 898-7074.

A community blood sampling took place for 701 persons, yet not considered if not above >4.5 , what I consider, flawed. Considering the Centers for Disease Control and Prevention in 2012 quote "No level of lead

①

NOTE

in the blood of children is currently thought to be safe," yet the beleaguered Health Dept. response is all too dismissive that would or could demonstrate a relationship that Mueller Industries Pollut effected this communities residents from exposure to established tested samples.

In a public notice of 10-30-2019 for a "public hearing, if requested" would be held on Dec 4, 2019. For a "proposed installation and operation of a new chip dryer. Yet, this public was never informed that due to request that proposed meeting would be held. Thus only two residents were there to share opposition to a chip dryer that would increase the "particulate in our air.

Now, while a company sought by Mueller's continues only soil within 1/4 mile facility the E.G.L.E. AT Public hearing confirmed air fallout of a couple kilometers ie 1.2 mile.

While I have included some information, I have many related documents that demonstrate an unfair mitigation and/or remediation to residents of and near Mueller Industries.

Ex. 6 Personal Privacy (PP)

Sincerely;

Ex. 6 Personal Privacy (PP)
